

Stay Safe this Winter

News Release Date

01-10-2024

Stay safe this winter.

Protect Natural Gas Meters

Remove snow and ice from natural gas meters with a broom or brush. Never kick or chip snow and ice away with a hard object.

Unblock Vents

Make sure external vents for dryers and other natural gas appliances are clear.

Heat Source Alert

Never use an oven or a gas stovetop to heat your home.

Minimize Frozen Pipe Risk

Leave faucets running at a trickle, leave cabinet doors open, and close all doors and windows to keep heat inside.
